”He’s seen a 10 times increased risk of endometrial cancer since people have been getting these COVID shots.” [8:37]

- Claims about the safety or serious side effects of COVID-19 vaccines, including:
 - Claims that COVID-19 vaccines kill or seriously harm people, which we define as leading to any of the following harmful side effects:
 - Death
 - Amyotrophic Lateral Sclerosis (ALS)
 - Multiple sclerosis
 - COVID-19 or a new COVID-19 strain
 - Autism
 - Miscarriages
 - Infertility or sterilization
 - Birth defects
 - Shedding
 - Altering DNA
 - Blood clots (except in relation to specific vaccines for which public health authorities have found possible links or are officially investigating such reports)
 - Alzheimer’s
 - Prion’s disease
 - Bell’s palsy
 - Erectile dysfunctions
 - Magnetism
 - Other side-effects which are incredulous or irrational, such as taking the vaccine turns you into a monkey (requires additional information and/or context).

- Claims about COVID-19 vaccines that contribute to vaccine rejection, including:
 - Claims about the availability or existence of COVID-19 vaccines, specifically:
 - Claims that COVID-19 vaccines do not exist or have not been approved
 - Claims that there are no Food and Drug Administration (FDA) approved COVID-19 vaccines if that content also suggests the vaccines are unsafe, ineffective, experimental, or have not been appropriately tested. Otherwise, we will allow claims that the FDA has not approved the vaccine, or make a clear distinction between a full FDA approval and an Emergency Use Authorization with appropriate context.
 - Claims that something other than a COVID-19 vaccine can vaccinate you against COVID-19
- Claims about the safety or serious side effects of COVID-19 vaccines, including:
 - Claims that COVID-19 vaccines kill or seriously harm people, which we define as leading to any of the following harmful side effects:
 - Death
 - Amyotrophic Lateral Sclerosis (ALS)
 - Multiple sclerosis
 - COVID-19 or a new COVID-19 strain
 - Autism
 - Miscarriages
 - Infertility or sterilization
 - Birth defects
 - Shedding
 - Altering DNA
 - Blood clots (except in relation to specific vaccines for which public health authorities have found possible links or are officially investigating such reports)
 - Alzheimer's
 - Prion's disease
 - Bell's palsy
 - Erectile dysfunctions
 - Magnetism
 - Other side-effects which are incredulous or irrational, such as taking the vaccine turns you into a monkey (requires additional information and/or context).

Mercola: We don't know the outcome because these emergency use authorization vaccines, there are essentially no safety studies ever proven. It's not that they haven't been trying to have messenger RNA vaccines ever invented before. They tried for many, many years and failed miserably. They've never been able to do it, and now they do it under the cover of emergency use, and we've got 200 million guinea pigs, probably more worldwide. Maybe 300 or 400 million, half a billion.

We've got probably hundreds – you can make a pretty strong, compelling argument there's tens of thousands of people who've died from this vaccine, even though there's only 7,000 recorded in the VAERS database. It's probably much, much higher than that. We have reports, even from Dr. Vladimir Zelenko, who's tried to put in two dozen reports, and they wouldn't let him. These are documented deaths from the vaccine, so we know that it's happening all over, suppression.

Alex Berenson @AlexBerenson · 3h
1/ URGENT.
@CDCgov has quietly more than DOUBLED the number of #Covid vaccine death reports in VAERS, the federal side effect reporting system.
CDC now says it has received reports of 12,313 deaths following Covid vaccination in the US - compared to under 6,000 last week.
7:29 AM cdc.gov
reports of death after COVID accination are rare. More than a billion doses of COVID-19 vaccines were administered in the United States from December 14, 2020, through July 19, 2021. During this time, VAERS received 12,313 reports of death (0.0036%) among people who received a COVID-19 vaccine. FDA requires healthcare providers to report any death after COVID-19 vaccination to VAERS, even if it's unclear whether the vaccine was the cause. Reports of adverse events to VAERS following vaccination, including deaths, do not indicate that the vaccine caused the death.
Safety of COVID-19 Vaccines
Some people have no side effects. Many people have reported side effects that may affect their ability to do daily activities, but they should go away within a few days.

Alex Berenson @AlexBerenson · 3h
2/ The new figure means CDC has now received more reports of deaths following Covid vaccination than ALL OTHER VACCINES COMBINED IN THE 30-YEAR HISTORY OF VAERS.
It is not clear why more than 6,000 death reports were added to VAERS in a week. Perhaps @CDCDirector can explain.

COVID-19 vaccines go through many tests for safety and effectiveness and are then monitored closely.

67% of deaths in VAERS were reported by health service employees, only 14% of all cases could rule out vaccine as contributing factor of death.

Analysis of COVID-19 vaccine death reports from the Vaccine Adverse Events Reporting System (VAERS) Database

Interim Results and Analysis

Scott McLachlan, Magda Osman, Kudakwashe Dube, Fatience Chiketero, Yvonne Choi, Norman Fenton

Risk and Information Management, Queen Mary University of London, UK
Birmingham Law School, University of Birmingham, UK
School of Biological and Chemical Sciences, Queen Mary University of London, UK

Health Informatics and Knowledge Engineering Research (HAKER) Group

Abstract

Clinically trained reviewers have undertaken a detailed analysis of a sample of the early deaths reported in VAERS (250 out of the 1644 deaths recorded up to April 2021). The focus is on the extent to which the reports enable us to understand whether the vaccine genuinely caused or contributed to the deaths. Contrary to claims that most of these reports are made by lay people and are hence clinically unreliable, we identified health service employees as the reporter in at least 67%. The sample contains only people vaccinated early in the programme, and hence is made up primarily of those who are elderly or with significant health conditions. Despite this, there were only 14% of the cases for which a vaccine reaction could be ruled out as a contributing factor in their death.

SAYER JI: The COVID-19 vaccines are only out there being deployed because of an Emergency Youth [sic] Authorization. This is not being validated through the normal, long-term safety studies that are required. It won't be until 2030 that these studies will even be finished. So how is it that you can't reference that fact and point out that this is a medical experiment . . . [3:30 – 3:50]

So which government is misinforming their citizens? The US or the UK?

Mark Logie (The Digital Outlander) @Digi_Outlander · 7m

(1/3) In a rare fit of common sense, the UK's #vaccine committee has decided not to vaccinate most children against #COVID19 because of the possibility it could trigger a rare heart condition.

#Covid19UK #CovidVaccine @mercola

🗨️ 1 🔄 🍷 📤

Mark Logie (The Digital Outlander) @Digi_Outlander · 7m

(2/3) It makes a change when our medical authorities recognise that, for most children, the risks of side-effects from a #covid #vaccine outweigh the supposed benefits.

#Covid19UK #CovidVaccine @mercola

🗨️ 1 🔄 🍷 📤

Mark Logie (The Digital Outlander) @Digi_Outlander · 7m

(3/3) And the benefits in vaccinating children against #COVID19 are fairly minimal: they don't usually get seriously ill from it & vaccinating them doesn't do much to stop the spread to adults.

- Claims involving conspiracy theories about a COVID-19 vaccine or vaccination program, including:
 - Claims that COVID-19 vaccines are designed to or were developed in order to control a population for non-public health purposes
 - Claims that specific populations are being used or targeted in order to test the true safety or efficacy of a COVID-19 vaccine

In addition, Pages, Groups, and Instagram accounts may be removed if they have shared content that violates our COVID-19 and vaccine policies and are also dedicated to sharing other vaccine discouraging information on the platform. Specifically, this type of content includes:

1. Sensational or Alarmist Vaccine Content:

- Content that otherwise does not violate our COVID-19 or vaccine policies above but that suggests that vaccines are ineffective, sacrilegious, unsafe, or irrelevant, in exaggerated, conspiratorial, or sensational terms. This includes content that makes generalizations about vaccine harms or utility in hyperbolic terms or without providing context, or which connects vaccination to a conspiratorial narrative about a purposely hidden widespread health harm, secret, or truth.

2. Criticizing the Choice to Receive/Provide Vaccines:

- Content that otherwise does not violate our COVID-19 or vaccine policies above but that disparages others on the basis of their choice to vaccinate, or on their choice to vaccinate others, including attacking language used towards vaccinated people or those administering vaccinations, or blaming people for misfortune after vaccination.

CHARLENE BOLLINGER: We look at the VAERS report . . . The latest number is almost 11,000 deaths from this one vaccine—in America! It’s almost double that in Europe. We see a lot of deaths. And the adverse events are almost a half a million. And ladies and gentlemen, the Human Health Services [sic] here in the United States, on their website, said that that number is under 1% of the actual numbers. You do the math. [14:33 – 15:00]

Sherri Tenpenny
July 26

TENPENNY: We are killing people. There are 11,000 dead people – 11,000 reports of deaths in the VAERS database . . . Tom Renz just filed a complaint with the CDC--45,000 confirmed via government whistleblower affidavit—45,000 deaths from the shot that are found in government databases—not conjecture; confirmed. And now, I have actually uncovered 40—four-zero—unique mechanisms of injury of how these shots are going to cause chronic heart disease, long-term neurological disabilities, horrible—horrifying things in terms of molecular mimicry and autoimmune diseases.
